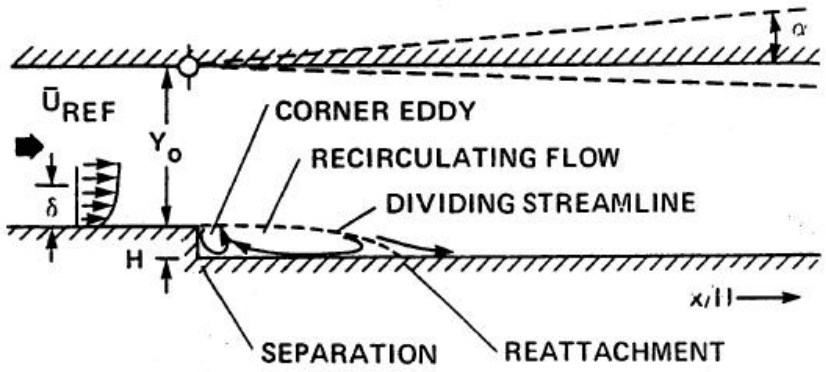
Frametitle

Colourful Sub-Title

- First bullet level.
  - Second bullet level.
    - Third bullet level.
- First bullet level again.

Frame With Figure



Typical Backward Facing Step Flow Configuration as an Example [Driver 1985]

- Important bullet point.

Frame With Table

- Important bullet point.

Re-Attachment Lengths Predicted by DES Turbulence Models

Solver Type	**Pressure-Velocity Coupling**	**Pressure Interpolation**	**Re-Attachment Length (m)**
Density Based			0.091
Pressure Based	Simple	Standard	0.148
Pressure Based	Simple	Second Order	0.129
Experimental			$0.0795 \pm 1.27 \times 10^{-4}$ [Driver 1985]

Thank You For Your Attention!
